

Welcome

For over 125 years LITTERER has stood for solutions to protect and restore buildings, and to avoid damage caused by the influences of the weather. This means experience with the largest steel and concrete structures, with the biggest bridges and the most imposing industrial buildings in Germany. Today the LITTERER Group has a presence throughout Germany in the fields of corrosion protection, fire protection, concrete maintenance, façade protection and scaffolding erection. Our efficiency and the quality of our work are employed in the service of maximum customer satisfaction.
